

Qumu Pathfinder Edge Appliance (SR)

Qumu Pathfinder Edge provides network friendly, intelligent delivery of video and associated media content. From live CEO broadcasts to new product introductions and global training initiatives, Pathfinder Edge makes enterprise-wide video communication efficient, reliable and secure.

Pathfinder Edge optimizes the streaming and delivery of both on demand and live enterprise video across the Wide Area Network (WAN), minimizing network load and maximizing cost savings.

Key Features and Benefits

 Minimize the impact of live webcasting on network traffic, by ensuring all videos are served from the nearest location.

 Perform software updates through a single interface, and leverage SNMP MIBs for monitoring all Pathfinder Edges from a central location.

 Benefit from extensive security within Pathfinder Edges and deployments, as well as for delivered content. Plus leverage RADIUS authentication for additional security.

 View real-time data about video performance and Pathfinder Edge usage, throughout the network.

With a Qumu Pathfinder Edge eCDN, enterprises can scale live webcasts and on demand videos to tens of thousands of viewers—while optimizing bandwidth on corporate networks.

Specifications

Pathfinder Edge Appliance (SR)

Dimensions (WxHxD)

17.1" x 1.7" x 19.6"

Unit Weight

25.5 lb

Power Supply

2x 450W

Processor

Intel® Xeon® CPU E3-2134 4C @3.5 GHz

Memory

16 GB RAM

Storage

2 TB (2x 2 TB drives in RAID 1 (mirrored) configuration)

Ports

Front: 1x USB Xclarity Controller Access, 1x USB 3.1 front

Rear: 2x USB 3.1, one VGA port (DB-15), 1 enabled RJ-45 GbE for XCC, 1 enabled RJ-45 GbE for network

Optional: 10GB add-on NIC

** This server comes with a three-year (Machine Type 7Y51) customer-replaceable unit (CRU) and onsite limited (for field-replaceable units [FRUs] only) warranty with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.*
