

Qumu Extension – Biblio

Increase the value of your communications with captioned videos. Biblio allows users to request closed captions in 60+ languages from DotSub via an easy to use web interface and automatically add them to Qumu Programs. A Qumu Qx extension compatible with Qumu VCC 7.5 and above and available for deployment as a virtual machine.

Key Features and Benefits

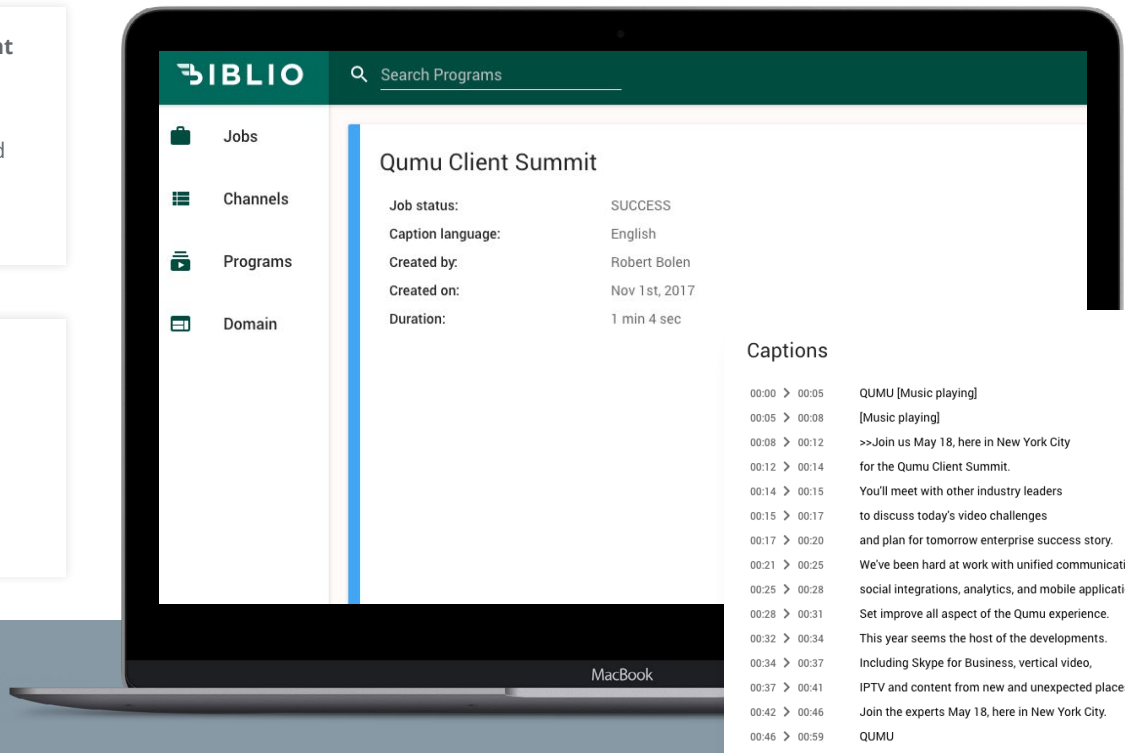

Maximize your videos' global reach.
 Biblio seamlessly integrate with the Qumu eco-system to allow users to request closed captions in multiple languages.

Take Biblio with you.
 Access Biblio directly via the browser to request captions for a Qumu Program, or adjust settings to automatically caption everything in a channel.

Empower your users with role-base permissions.
 Biblio supports granular role-base (Channel Managers, Publishers and Viewers) permissions for management.

Improve viewer engagement and retention.
 By adding captions to your media content, viewers spend more time and engage more with your videos.

Get more value.
 Language-enabled videos result in improved discovery, engagement, time spent, and value.
